Min Bet: 0.20

Max Bet: 50.00

Star Pops is the latest video slot from London based games studio Electric Elephant. This vibrant and volatile cluster pays game features increasing symbol multipliers, sticky star wilds and free spins. Huge wins can be created when two or more winning clusters share a wild. When this happens, all multipliers combine to produce win multipliers of up to 1000x

On the face of it, this offering looks like a simple cluster game but scratch below the surface and you'll notice that in Star Pops, Electric Elephant have tried to do something a little different. Symbols float up instead of dropping down and there's no symbol hierarchy. Instead, values increase based on consecutive wins. Essentially, the player gets a new paytable every spin!

In short, Star Pops combines a beast of a math model with a clean, colourful theme. Vivid symbols and clusters of colour mean wins are easy to spot by players even on the smallest of mobile devices. All packaged with a contemporary electro pop cherry on top, Star Pops will appeal to a wide range of players and keep them coming back for more.

FEATURES

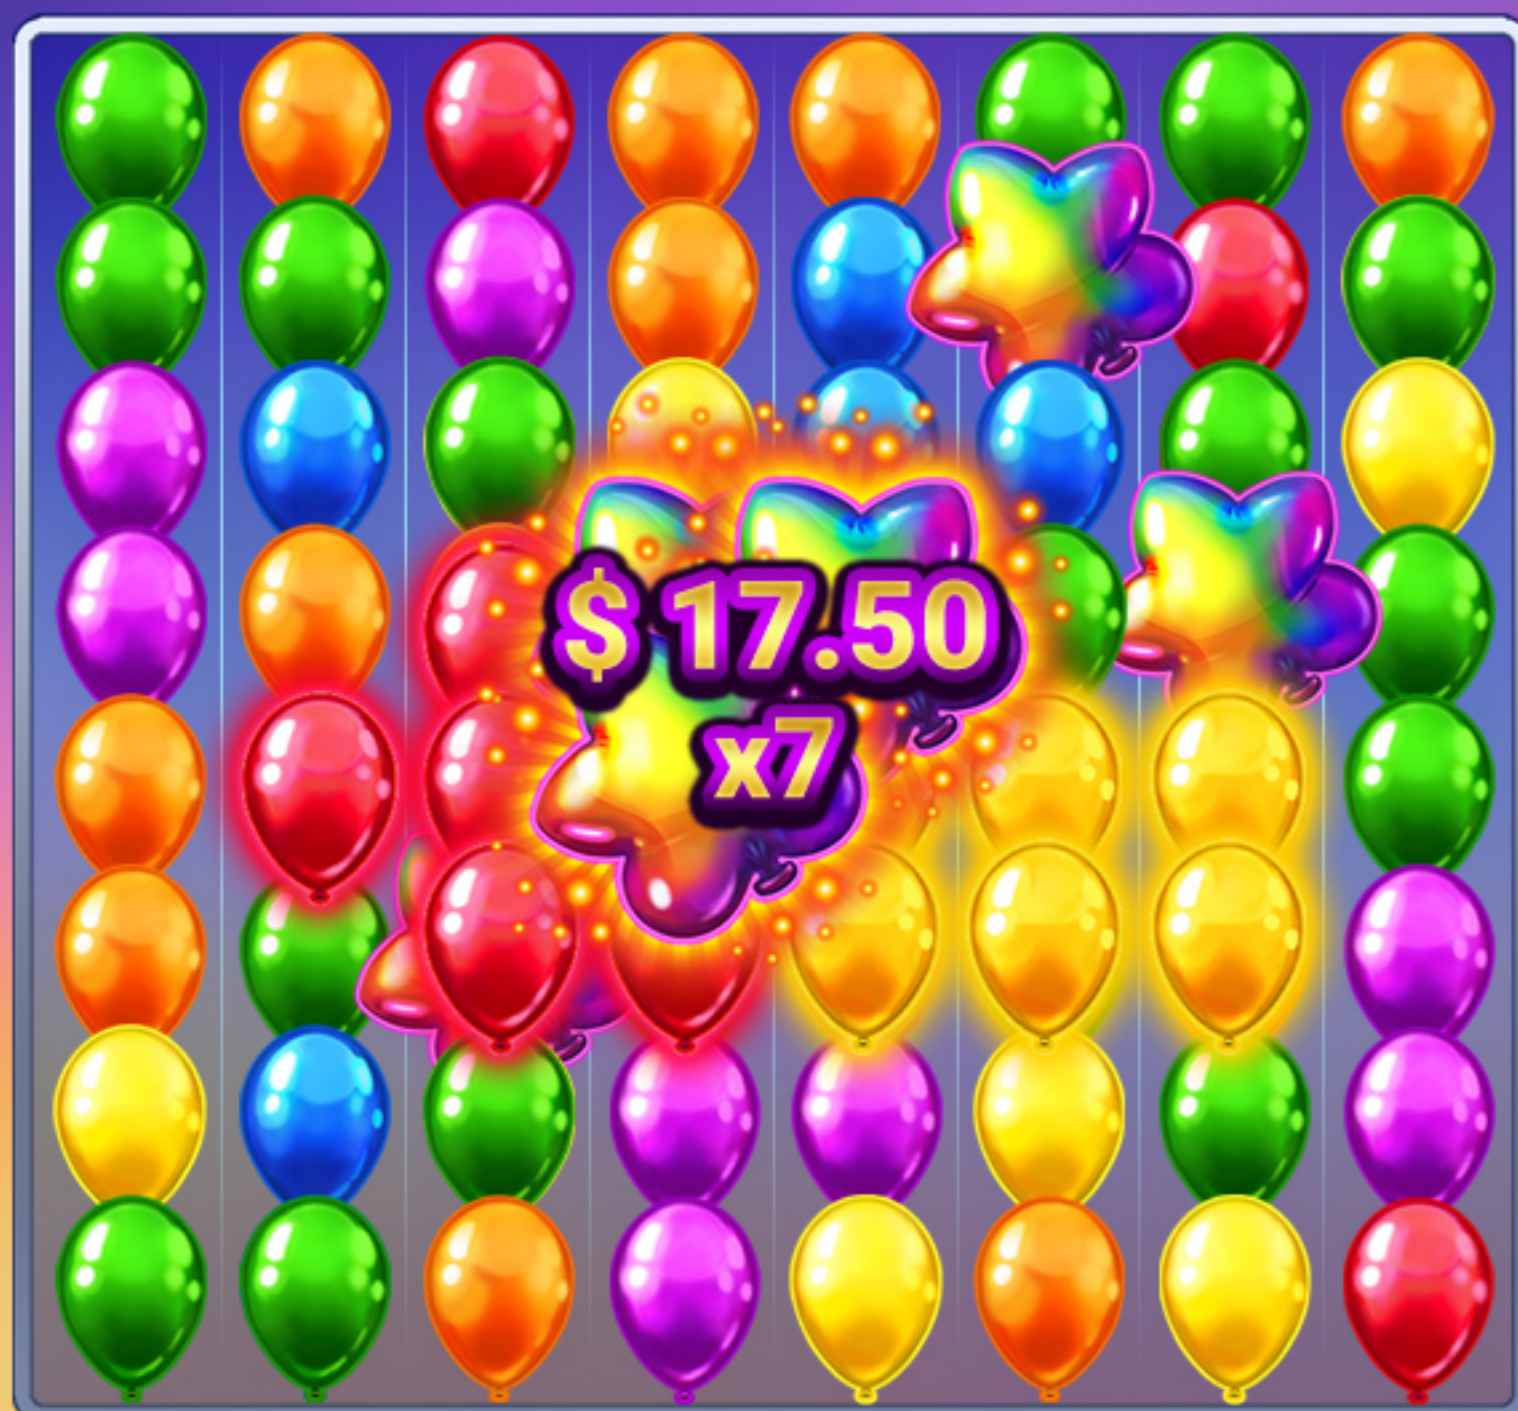

INCREASING MULTIPLIERS

Every time there is a win with a particular symbol, its multiplier that starts at 1x increases by 1

STAR WILDS

Stars are wild and substitute for any symbol. When 2 or more clusters share a wild, the individual symbol multipliers combine to produce win multipliers of up to 1000x

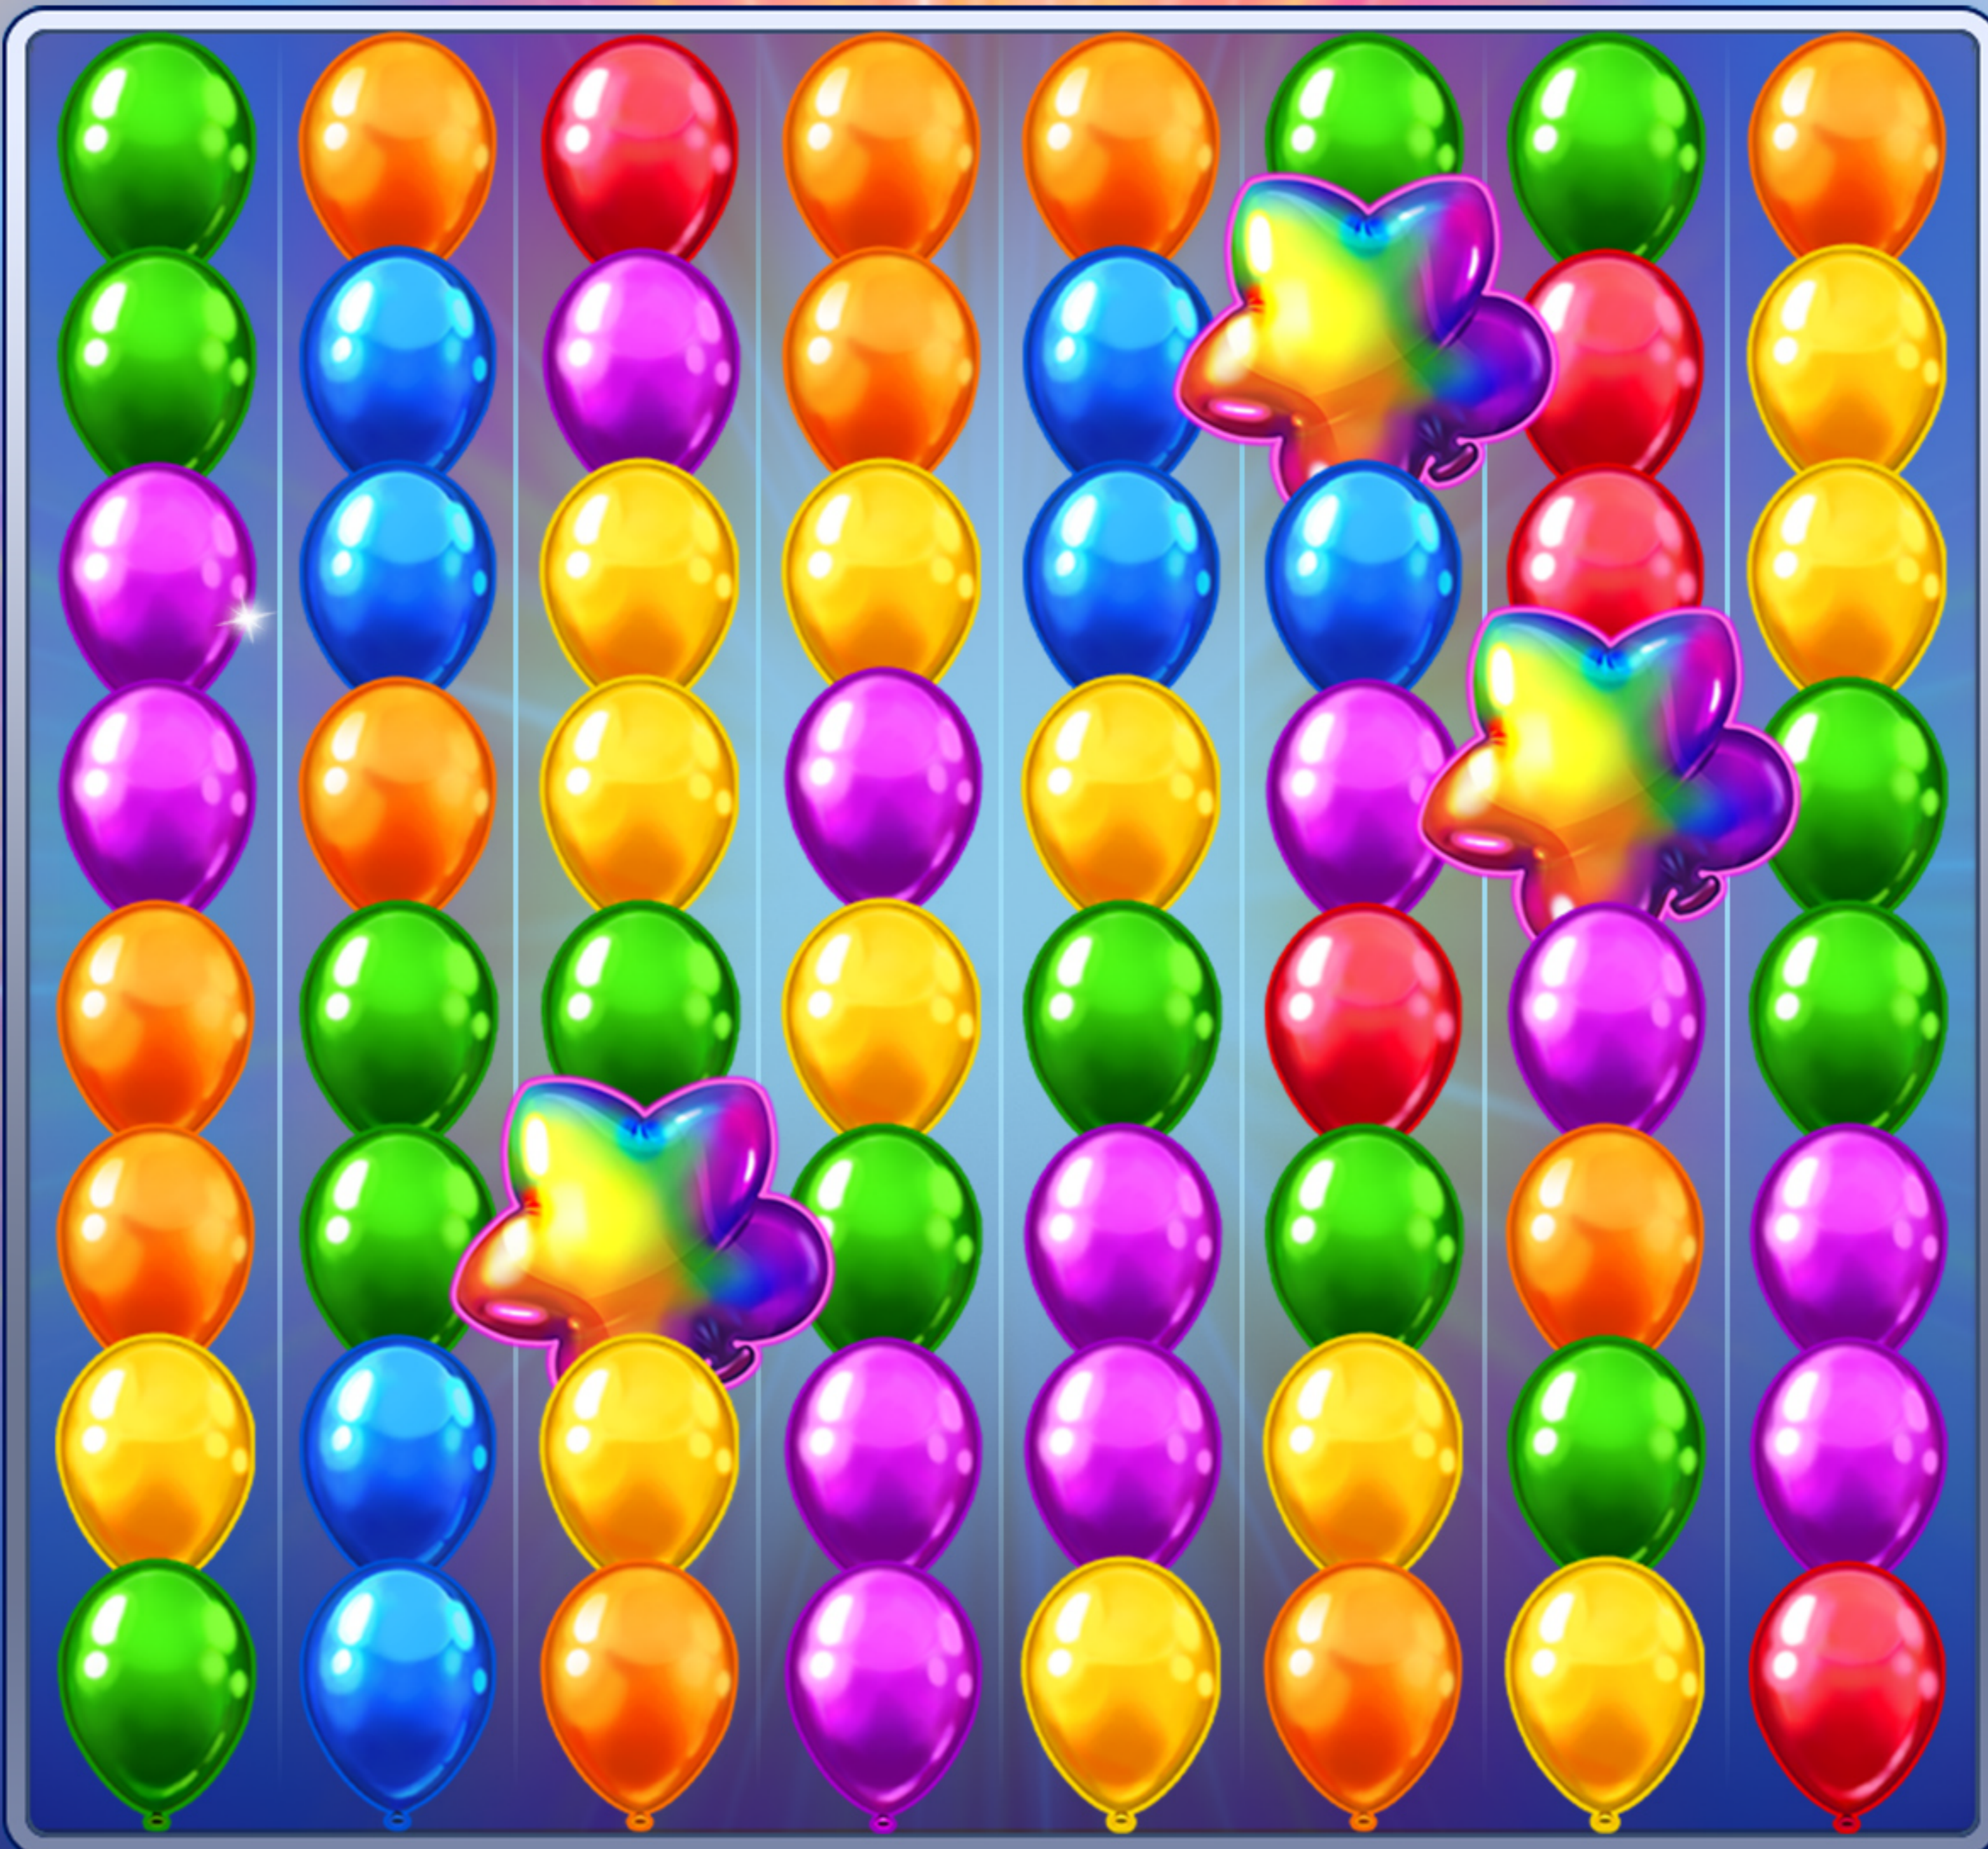

FREE SPINS

3 star wilds on the screen at any one time trigger 7 free spins. The triggering wilds remain on the screen throughout the free spins session and are assigned random positions before the start of each free spin. Any symbol multipliers set during the base game trigger spin carry over into free spins and continue to increase +1 for every win.

DESTROY FEATURE

When there are no wins on the screen, a symbol may be chosen at random. Using that symbol as a centre point, all symbols in a double diagonal line are destroyed resulting in a free cascade giving players a second chance to win
